
MY TRIP AND MORE

My Trip and More provides instant, real time access to travel plans 24-hours per day, 7-days per week. This graphical detailed display lets travelers view or e-mail itineraries containing air, car, hotel, rail, cruise, and tour reservations, as well as access to e-ticket information, weather, mapping, hotel images, flight information and travel related content.

Itinerary details can be downloaded to an electronic calendar, and travelers can then sync their itinerary onto their PDAs. My Trip and More is the first Worldspan product to incorporate wireless technology that provides itinerary access from a wireless Palm device, or any Internet-ready mobile telephone.
