

## Worldspan SecuRate Air®/Pricing via ATPCO

### Two types of SecuRate Air fares via ATPCO fare types

- 1) SecuRate Air Private- Private fares for a specific Worldspan SID or IATA number. No updates are permitted by any Worldspan subscriber. Private fares use security in ATPCO Category 15 (Cat 15).
- 2) SecuRate Air Net- Private or negotiated fares with the capability of using selling or net fare amounts for a specific Worldspan SID or IATA number. Subscribers have the option of marking up a net fare filed via ATPCO. This process uses negotiated fares rule category 35 (CAT 35).

SecuRate Air Plus Private – private fares for a specific Worldspan SID or IATA number. No updates are permitted by any Worldspan subscriber. Private fares use security in ATPCO Category 15 (Cat 15).

SecuRate Air Net – private or negotiated fares with the capability of using selling or net fare amounts for a specific Worldspan SID or IATA number. Subscribers have the option of marking-up a net fare filed via ATPCO. This process uses negotiated fares rule category 35 (CAT 35).

Fares Display/Pricing Options apply to both SecuRate Air Plus Private and SecuRate Air Net fares.

Fares filed via the Airline Tariff Publishing Company (ATPCO) can be displayed, priced, and ticketed using the fare type code SR. When appended to a pricing entry, the system checks for the lowest fare including published, SecuRate via ATPCO, and/or SecuRate Air Plus.

To request only SecuRate Air fares, add .SR to the end of the entry.  
Example: 4FDENMCOSR.SR

Fare Quote via ATPCO / Basic Options	
4FDENMCOSR	Basic fare quote
4FDENMCOSR-DL	Specific airline
4FATLLONSRN-BA	Fare quote SecuRate and normal

```

Lines 5 and 6 are SecuRate Air Net (CAT 35 fares) negotiated fares. This is indicated by:

- The letter **N** preceding the Fare Code, on the initial 4F display in the Fare column, indicates a net amount is displayed.
- Selling ranges, if applicable, are shown in the MRN display.
- MRN authorization field of: **UP** (Update), **RD** (Redistribute), **SL** (sell), **TK** (Ticket). Fields are populated with appropriate authority of: Y=Yes, N=No.
