

Rapid Reprice Select Quick Reference

Display Template		HELP REISSUE
Automates the pricing for re-issuing electronic tickets issued on participating carriers. It uses historical data, current fares, and rules to re-price a revised itinerary. The results include any additional collections, changes and penalty fee amounts.	\$P-AR	Begins Rapid Reprice process using booked class of service.
Pricing Options for Displaying Rapid Reprice Select		HELP \$P-AROPT
The following pricing options are permitted with Rapid Reprice Select. They cannot be combined with other Power Pricing options that define segment changes (i.e. \$P-AR#FNP is valid but \$P-AR#S2-24JUNATLMIA#FNP is not when an itinerary has been modified.).		
Fare Type of Non-Penalty (NP)	\$P-AR#S2-STLDFW#FNP

Rapid Reprice Select Templates

The reissue process is accomplished through a series of templates. A PNR must be displayed before using the entry to display the template. The information automatically populates from the PNR. Tab to each field to change any information. Insert and delete keys should not be used when filling in the template. If the first or last character of each field is moved or typed over, an error response is received upon entering. If this occurs, the template must be redisplayed.

Modified Itinerary

```
1P- 409WG2
1. 1DEAN/LUCY*ADT

ACTION( ) ALTERNATE NUMBER- R/RETURN - E/EXIT- H/HELP
)>
```

The Rapid Reprice Select Results screen consists of the header – alternate flight options, scroll command (CMD) and an Action field. The scroll command option is available for Move Up (MU) and Move Down (MD) scrolling. Use the action field to input the alternate number desired and enter. Alternates are displayed in a lowest to highest order. A refund is lower than an Even Exchange which is lower than an Additional Collection.

Entry – Scroll CMD (MD) to move down to additional alternates
 Response – Rapid Reprice Select Results Screen
