

## e-Pricing/Flexible Shopping Suite Quick Reference

Go! customers can self-activate e-Pricing Power and Flex shopping products from their workstation. Activation is by device address (DA). Activation is immediate and customers will be charged accordingly. Messaging customers and those customers who do not have dedicated device addresses need to contact their Worldspan representative for activation. Special procedures are also in place for locations within distributor markets; agents in these markets need to contact their Distributor Help Desk for details and assistance.

### Determining the e-Pricing Subscription Level

To view the activated e-Pricing Tier Level, enter **4PLI\*ETL**.

The response will be: POWER PRODUCTS – TIER X (X represents the e-Pricing level currently active). In addition, Flex Shopping Activation information will be returned.

### Go! Activation and Deactivation Entries

Activation of e-Pricing and Flex Shopping Options is done on each individual computer (after Go! login) by the Worldspan user. Select and activate the appropriate e-Pricing Tier Level before activating Flex Shopping Options. In order to change Tiers, the current Tier Level must be deactivated before another Tier Level can be activated.

| <b>e-Pricing Tier One</b>   |                                  |   |
|---|----------------------------------|---|
|   | <b>Step 1</b>                    | <b>Step 2</b>                               |
| Activate e-Pricing Tier 1   | <b>4PLI*ACTIVATE/POWER</b>       | <b>4PLI*BILLOK</b> (type in Manager's Name) |
