

Encode/Decode Go! Script

Overview

Introduction This document contains an overview of the Worldspan Encode/Decode Script available to users on Worldspan Go! Res.

File name

File (Script) Name	Brief Description
ZG_Encode/Decode	Used to find the code for a name and the name for a code. The file resides on the Middle Tier Server.

Need Help? Click on the link below to submit a question or issue to the Worldspan Help Desk: <http://www.worldspan.com>, then select the Help Desk Support link from the menu on the left.

Overview Encode/Decode allows the user to quickly determine the name for a code or the code for a name and eliminate the need to memorize the codes and names for the seven categories used in the Worldspan system.

Operating Instructions

Script Conventions

- Go! Res and scripts are designed to operate in a full screen. With the cursor active in the script area, press <F11> to shrink the toolbar at the top of the screen. Then right click on the small icon toolbar and click on auto hide to display Go! Res and scripts as full screen.
- In Go! Scripts, mandatory fields are indicated by a red ► arrow. The black ▼ indicates a drop down list is available for applicable choices for the input box or the ability to scroll for more information.
- Many fields are on-click events, which means the user must click in a field before the field appears as mandatory or takes on other properties (e.g., additional input fields).
- In some cases, tabbing through a form bypasses the mandatory indicator for a field, leaving it blank results in an error (see Errors).
- Most input fields have examples of the requested information in a tool tip. A tool tip quickly appears when the pointer pauses over a button or field (mouse-over).

- Script forms may contain fields with conditions which would disable other fields and/or buttons (e.g., clicking on Alliance Availability Option disables the 8 and 24 classes of service Availability Display Options, or leaving a field blank disables other fields pertaining only to that blank field).
- The Enter key may be used throughout the scripts with the exception of pop-up boxes and the calendar.

Need to Know

WfW Worldspan Res has provided the capability to pause and resume ScriptPro scripts using the keystroke combinations <Ctrl>W and <Ctrl>R. Go! Res cannot retain all the previous default keystrokes due to the browser defaults. The left side (terminal emulator/Go! Res) has retained some of the Worldspan keystroke defaults. If the focus is in the terminal emulator/Res side, <Ctrl>W pauses a ScriptPro script and <Ctrl>R resumes a ScriptPro script. The right side of the window (Index/Go! Res scripts) takes on the Browser/Windows keystroke and local macro defaults. HOWEVER, when the focus is in the right side/Go! Script/Index/Tools area, the <Ctrl>R may cause a Microsoft Internet Explorer error and throw the user out of the product or launch a macro, while the <Ctrl>W shuts down the product. It is important to check the focus prior to using keystroke combinations. To move the focus, click on the right or left side.

Access

From Worldspan Go! Res:

- Access the script from the Book Tab in the Script Index
 - Select Encode/Decode - Go! to launch the script
-

Main Form

The form for the Encode/Decode script provides the types of categories and requests the name or code to be processed.

Encode/Decode 1

Encode/Decode: ▶ ▼
Name or Code: ▶

Categories

The following categories for codes and names are processed:

- Airline/Train
 - City
 - Hotel Vendor
 - Rental Car Vendor
 - Passenger Type Codes
 - Credit Cards
 - Country Codes
-

Operating Instructions, Continued

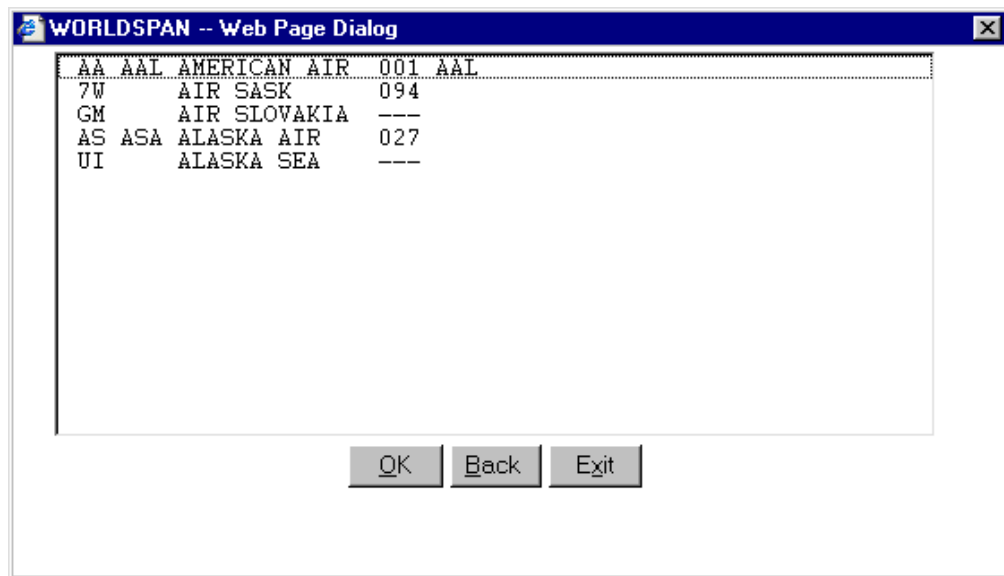

Response The script sends the entry to Res, reads the response in Res and displays the response in the form. The following is a typical Encode and Decode response:

Encode/Decode 1

Encode/Decode:
Name or Code:

Result:
AS ASA ALASKA AIR 027

Similar Name List Inputting an incomplete or misspelled name pops-up a similar name list box.
