

Find It/Map It (USA and Canada) – Go! Script

Overview

Introduction This document contains an overview of the Wordspan Find It/Map It – Go! Script available to users on Worldspan Go! Res.

File name

All Scripts Name	Brief Description
ZG_FindIt	Provides a list of references with access to area maps for various commodities near the requested location.

Need Help? Click on the link below to submit a question or issue to the Worldspan Help Desk: <http://www.worldspan.com>, then select the Help Desk Support link from the menu on the left.

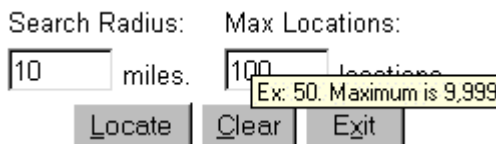

Overview Using MapPoint, this script processes area maps based on local references for a desired location in the USA or Canada. Whether the location is a hotel address or any partial address, MapPoint provides a list of service, government, restaurant, transit, and tourist locations within the guidelines of the request. The user is able to request an area map for each location from the list. The ability to control the search radius and maximum number of locations is offered with defaults of 25 miles and 100 locations.

The Find It / Map It - Go! script opens another instance of the browser for each map request, leaving Go! Res intact. Select the 'X' at the top right of the map to close that browser instance.

Operating Instructions

Script Conventions

- Mandatory fields are indicated with burgundy text
- A black arrow pointing down indicates a drop down list is available for applicable choices for the input box, or the ability to scroll for more information.
- Some forms may contain input fields with conditions that would disable other fields and/or buttons (e.g., selecting a Move option will disable the ability to select specific Rule Categories to view, or leaving a field blank disables other fields pertaining only to that blank field).
- In a list where the choices are Yes or No, leaving the field blank is also No.
- Use the <Tab> key to move in order to each input field. Use <Shift><Tab> to move in reverse order. Or use the mouse to click on the needed input field.
- Most input fields have examples of the requested information in a tool tip. A tool tip quickly appears when the pointer pauses over a button or field (mouse-over).

- Some fields contain a “hot key.” This is an underlined letter. Pressing the <Alt> key and the underlined letter together will move the cursor directly to that input box.
- The <Enter> key may be used in place of the OK button.

Need to Know

Previously, Worldspan Res had provided the capability to pause and resume ScriptPro scripts using the keystroke combinations <Ctrl>W and <Ctrl>R. Since Go! Res is on the Web, the right side of the window (Index/Go! Res scripts) takes on the Windows keystroke and local macro defaults. The left side (terminal emulator/Go! Res) has retained some of the Worldspan keystroke defaults. If the focus is in the terminal emulator/Res side, <Ctrl>W pauses a ScriptPro script and <Ctrl>R resumes a ScriptPro script. HOWEVER, when the focus is the right side/Go! Script, the <Ctrl>R does nothing or launches a macro and the <Ctrl>W shuts down the application. It is important to check the focus prior to using keystroke combinations. Simply click on the right or left to move the focus.

Access

From Worldspan Go! Res:

- Access the script from the Misc Tab in the Script Index
 - Select Find It/Map It – Go! to launch the script analyze
-

Selection Form

The main form provides many options for type of references to map for the desired location. Select the type of reference from the “Find” list and provide location information (minimum of a zip code or city and state) before selecting the “OK” button. The “Clear” button erases any populated fields. The maximum capability for the search radius is 300 miles and 9,999 for locations; the defaults are 25 miles and 100 locations. Enter the maximum to meet your needs for each search. “Exit” returns to the Index.

Find It / Map It (USA and Canada)

Find:

Located near...

Address / Intersection:

530 William Penn Place
